

This might look like an ordinary stage. But when Staging Directions married moving lights, projectors, and custom scenic panels, they created a high tech interactive set.

A 24-foot wide center-stage turntable rotated to reveal both presenters and entertainers, astonishing the more than two thousand attendees at the San Francisco Marriott Yerba ballroom.

Christie LX120's and High End DL.2's projected both from the front and rear of this custom rotating scenic flat.

The audience was blown away and the client remarked they he had never seen anything like it at their sales meetings.

In addition to an opening performance from the San Francisco 49ers cheerleaders, the Fab Four made a guest appearance. Actually, a Beatles tribute band delighted the attendees with an evening of musical entertainment.
