

High Definition Video Production

Not only is Staging Directions your best partner for staging live events, we can also assist with the production of videos including on-site candids modules.

We have upgraded our camera inventory. The Sony PMW-EX1 SDCAM is the latest in a new generation of video recording technology. This dynamic camera is a flash-memory based high definition camcorder capable of a variety of frame rates and resolutions using Sony's new XDCAM-EX intraframe codec. It will even shoot "film-like" 24p mode.

SxS Solid State Recording Technology is built for today's most demanding applications. Based on Expresscard/ 34 interface the Sony PMW-EX1 makes ultra-high transfer rates possible, up to 800 Mb/s. Save time and money.

This exciting new camera perfectly complements our Final Cut Pro high definition editing suites.

Staging Directions' in-house video production facility contains three Final Cut Pro edit suites. We have experienced award-winning shooters and editors to support your video production needs including training videos, opening and closing event modules, on-site candids modules, streaming web videos, etc.

Let us know if we can be of assistance in this area. We look forward to working with you.
